

Best practices

1090

Facilities for female students and staff are provided to feel comfortable during their stay in the campus. 1090 is an active unit of VSSD college and it monitors issues related with girls's safety and empowerment and gender sensitization. We have counseling facility and separate common room for girls as well.

Waste management

We try to manage Solid, liquid and e waste in line with green building standard. Rainwater harvesting pit is made in the college campus to preserve ground water. All green practices are adopted to reduce pollution for example- tree plantation, anti polythene campaign, cleanness drive etc.
