

**Mentor-Mentee Programs (Bachelor of Education)**  
**(Session 2025-26)**

The Department of Education has successfully carried out the Mentor–Mentee programme with the aim of supporting student-teachers in their academic journey as well as their professional preparation. The initiative focuses on developing teaching competencies, confidence, and overall personality of the trainees.

Under this system, each faculty member was allotted a group of students to provide consistent guidance and supervision. Regular interactions were organized to review their academic progress, attendance, lesson planning, and teaching practice experiences.

Throughout the session, students were actively engaged in activities such as micro-teaching, classroom simulations, and school internships. These engagements enabled them to strengthen their pedagogical skills and gain practical exposure to real classroom situations.

Mentors also extended support in dealing with personal concerns, stress during teaching practice, and challenges faced in classroom management. An open and friendly atmosphere encouraged students to share their difficulties freely.

Students were motivated to take part in academic and co-curricular programmes like seminars, workshops, group discussions, and teaching demonstrations. Special emphasis was placed on the integration of digital tools and modern teaching techniques in the learning process.

Guidance related to career opportunities in teaching, preparation for eligibility tests such as CTET/TET, and further studies in education was also provided.

The mentoring system proved useful in recognizing the different learning needs of students. Extra assistance was given to those who required support, while talented students were encouraged to perform at a higher level.
