**MENTOR-MENTEE REPORT**

**Academic Session: 2025-2026**

**Month: February**

The Department of Chemistry successfully carried out the Mentor-Mentee system with the aim of offering academic support, emotional guidance, and overall personality development of students.

Each mentor was allotted a specific group of mentees to provide individual attention and guidance. Regular mentoring sessions were organized to review academic progress, attendance, and to resolve subject-related issues. Emphasis was placed on strengthening problem-solving abilities, enhancing language proficiency, and developing effective communication skills.

During the academic session, a significant number of students actively participated in problem-solving activities and interactive mentoring sessions. These initiatives enabled students to address their academic difficulties and build greater confidence in Chemistry.

Mentors also extended support in dealing with personal and emotional concerns, creating a friendly and supportive atmosphere. Students were motivated to take part in various academic and co-curricular activities such as quizzes, debates, and presentations.

Guidance regarding career opportunities was provided to help students explore higher education options, prepare for competitive examinations, and develop relevant skills. The mentoring system also facilitated the identification of slow and advanced learners. Necessary actions were taken for those who needed additional support, while high-performing students were encouraged to achieve higher levels of excellence.
